

FULL CIRCLE

Featured Project

For a couple of years, I had been wanting to update my late 90's traditional kitchen into something more modern. I also wanted to expand the kitchen into a former entry area, which involved knocking out a wall.

Full Circle designed a new floor plan for the kitchen that allowed me to utilize the extra space. Angela and Max worked with me at pulling all of my ideas and "wants" together and making suggestions that I would not have thought of myself to provide a cohesive look. Jim and Gary did a great job with quality work as always.

I'm so happy and thankful every time I look at my new kitchen.
