

Full Circle

Crocker Residence

Full Circle
Project of
the Month

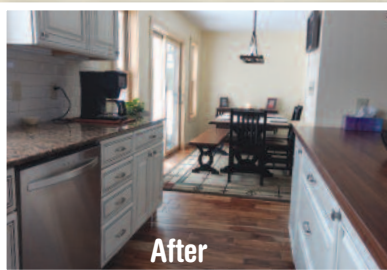

Full Circle worked with us, and our architect, to create a dining room out of the partial covered deck on our home. This project required great detail - walls had to be removed and supports for the roof installed. Further, they assisted us with a complete removal and remodel of our kitchen. We had knowledge of Full Circle since they built my parents' house after a fire. This was our first project through their company.

We found all the staff to be very professional and courteous. They cleaned everything up every day before leaving. They made sure to put down protective plastic on the hardwood floors to keep from scratching.

We really enjoyed working with Jim, as he was very particular with every aspect of this project and has a very good eye for the details!

Angela was tremendously creative in designing the kitchen, making it functional and adding

eye appeal. We have really enjoyed our new kitchen and dining since the completion.

From this experience alone we would recommended them and we would definitely use them again. Thanks to Full Circle for a job well done!
