Full Circle  
Project of  
the Month

Full Circle has been very easy to work with over the past years. Back in 2002, we had extensive interior and exterior work done by them. When we decided to build a new garage we again hired them since our first experience went so well. The latest project was a 32 ft x 28 ft garage with a 10 ft covered porch. The carpenters who worked on the structure were very courteous and easy to work with. They always kept the site clean and clear of debris and they were very skilled at their craft.

Additionally, the staff in the office were very helpful at bringing together all the products and pieces to make the project flow smoothly. From a concept drawing we supplied their office staff were instrumental in getting the full package together, including all permits, inspections and subcontractors. They even were able to go back to their records on our sid-

ing job (16 years ago) and find the matching siding to our home and track down the same siding for a perfect match.

It is easy to see why Full Circle is a well-respected hometown contractor that has been in business for 40 years now. We would recommend them to any of our friends of family for quality you can count on work. We have a major project scheduled for next year and we plan to use Full Circle for this as well.

Overall, this was a very positive experience. Thanks Full Circle!!
